

## MANAGE THE SECURITY OF ALL THE COMPUTERS IN YOUR NETWORK AND CONTROL USER PRODUCTIVITY AT THE LOWEST POSSIBLE COST OF OWNERSHIP

**Panda Security** presents its simple and light endpoint security and productivity solution. **Endpoint Protection Plus** provides centralized and uninterrupted protection for all of your Windows, Mac and Linux workstations, including laptops and servers, in addition to the leading virtualization systems and Android devices.

**Panda Security's Collective Intelligence** technology protects all workstations and servers against threats and exploits that use unknown zero-day

vulnerabilities in real time, without needing to install additional servers or IT infrastructures. It also monitors and filters Web traffic and spam, allowing the company to focus on its business and forget about unproductive employee behavior.

With **Endpoint Protection**, the protection is managed conveniently and easily from a single Web console, permitting centralized administration anytime and anywhere, without needing technical knowledge.

## Simple and centralized security for all devices

Centralized management of security and product upgrades through a simple Web browser for all network workstations and servers. Manage your Windows, Linux, Exchange Server, Mac OS X or Android protection from a single administration console.

## Remedial actions

Run Cleaner Monitor remotely and repair workstations infected with advanced or non-conventional malware.

Remotely reboot servers and workstations to ensure the latest product updates are installed.

## Real-time monitoring and reports

Detailed monitoring of your IT infrastructure in real-time thanks to comprehensive and intuitive dashboards.

Reports can be generated and sent automatically, detailing the protection status, detections and inappropriate use of resources.

## Profile-based protection

Assign profile-based protection policies, ensuring the most appropriate policies are applied to each group of users.

## Centralized device control

Prevent malware entry and data loss by blocking device types (USB keys and modems, webcams, DVD/CD drives, etc.), whitelisting specific devices and preventing dangerous actions (access, read, write)..

## Web monitoring and Filtering

Increase user productivity by preventing and/or monitoring access to content belonging to categories considered dangerous or unproductive during working hours, regardless of the type of browser used.

## No more saturated mailboxes

Reduce the risk of attacks on your Exchange servers with the content filter feature. Improve end-user productivity and protection by filtering unwanted and malicious messages with the anti-malware and anti-spam engines.

## Malware Freezer

Do not get burnt by false positives again. Malware Freezer freezes detected malware for seven days just in case there is a false positive, in which case the file is automatically restored to the system.

## ISO 27001 and SAS 70 compliant. Guaranteed 24x7 availability

The solution is hosted on Microsoft Azure with complete data protection guaranteed. Our data centers are ISO 27001 and SAS 70 certified.

## CLOUD BASED MANAGEMENT PLATFORM

Aether's cloud-based platform and management console, common for all of Panda's endpoint solutions, provide optimized advanced and adaptive security management inside and outside the corporate network. Minimize complexity and maximize flexibility, granularity and scalability.

### Generates more in less time. Easy implementation

- Deploy, install and configure the solution in minutes. Immediate value from day one.
- A single lightweight agent for all products and platforms (Windows, Mac, Linux and Android).
- Automatic discovery of unprotected endpoints. Remote installation.
- Proprietary proxy and repository/cache technologies. Optimized communication even with endpoints without an Internet connection.

### Simplified operations. Adapts to your organization

- Intuitive Web console. Flexible, modular management that reduces the total cost of ownership.
- Configures users with total or limited visibility and permissions. Action audit.
- Group and endpoint-based security policies. Predefined and custom roles.
- Hardware and software inventories and change log.

### Easy scaling of security and management capabilities over time

- No need for new infrastructure to deploy the modules. No deployment costs.
- Real-time communication with endpoints from a single Web console.
- Dashboards and indicators per module.

### Compatible solutions within the Aether Platform:

 Panda Endpoint Protection  Panda Endpoint Protection Plus

### Supported Platforms and System Requirements of our Endpoint Security Solutions:

Windows Servers & Workstations:
